Results-driven IT Lead and Product Manager with 13+ years of experience in **database administration, data analysis, and enterprise solutions** across manufacturing and service industries. As a Product Owner, skilled in **translating business** needs into **technical solutions, managing product backlogs, defining acceptance criteria**, and delivering data-driven insights through **Power BI** dashboards. Recognized for **bridging technology** and **business strategy** to enable scalability, innovation, and data-driven decision-making. Proven expertise in **SQL Server, Progress, QAD ERP** with a strong track record in **database optimization, high availability and disaster recovery**. Adept at leading cross-functional teams, mentoring DBAs, and driving process improvements to ensure operational efficiency and business continuity.

Core Skills

Product Ownership, Agile / Scrum, Compliance & Risk Systems, Stakeholder Management, Data Analytics, SQL, Power BI, JIRA, ERP, Business Analysis, Product Backlog Management, IT Delivery Management, Data Governance, Go-to-Market Strategy, KPIs, Customer Feedback, Business Goals, Product Lifecycle, Data-Driven Decisions, Cross-functional Team Leadership

Product Ownership & Strategy

- Defined product vision, roadmap, and release strategy aligned with business goals; translated objectives into actionable user stories with measurable KPIs.
- Managed and prioritized product backlogs, ensuring stories met Definition of Ready (DOR) and Done (DOD).

Agile & Delivery Management

- Led Agile/SAFe initiatives, bridging business and tech teams to deliver value-driven features on time.
- Partnered with Scrum Masters to track sprint velocity, burndown metrics, and manage dependencies and risks.

Data Analytics & Insights

- Delivered actionable insights using Power BI to drive data-informed decisions and KPI-based performance tracking.
- Collaborated with data engineering teams to ensure data integrity and optimize reporting processes.

Digital Solutions & Transformation

- Executed enterprise transformation projects end-to-end, identifying opportunities from market/user analysis and achieving ROI.
- Ensured milestones, budgets, and KPIs aligned with strategic goals and value realization.

Leadership & Stakeholder Collaboration

- Built consensus with senior stakeholders on priorities and outcomes; represented product in executive meetings.
- Mentored cross-functional teams, fostering accountability, collaboration, and product-focused mindset.

Work History

2022-02 - Current

Senior Consultant *JKTech Ltd, Chennai(2022-2025)*

- Owned and prioritized the **product backlog** for enterprise Data & Analytics initiatives, aligning features and enhancements with business value and stakeholder priorities.
- Defined and refined **user stories and acceptance criteria**, ensuring clarity between business teams (Finance, Sales, Operations) and technical teams (DBAs, developers, data engineers).
- Collaborated with cross-functional teams to design and deliver **Power BI dashboards, Tableau reports, and SQL-driven data products**, improving data-driven decision-making.
- Facilitated **sprint planning, backlog grooming, and retrospectives** as part of Agile delivery, ensuring timely and quality product releases.
- Delivered enterprise BI dashboards that improved decision-making speed and accuracy.
- Successfully managed end-to-end product lifecycle for data warehouse migration to cloud.
- Introduced backlog prioritization frameworks, improving delivery efficiency by 25%. Enhanced stakeholder engagement by transforming technical outputs into **customer-centric product outcomes**.

2020-10 - 2022-02

Lead Consultant

Birlasoft Limited, Chennai

Ingersoll Rand – MFGPRO (2020- 2022)

- **Team Leadership & Optimization:** Led the end-to-end delivery of data-centric product initiatives, integrating QAD ERP systems with analytics modules that automated performance insights and business reporting.
- **Stakeholder Collaboration:** Partnered with business stakeholders to translate operational objectives into actionable product requirements and technical stories.
- **Agile Delivery:** Drove agile delivery cycles, managing backlog prioritization, sprint planning, and release iterations to ensure business outcomes aligned with product goals.
- **Data Visualization:** Leveraged data visualization and automation to optimize marketing and operational decision-making, reducing manual interventions by 40%.
- **Knowledge Sharing & Team Development:** Fostered a collaborative environment through knowledge-sharing initiatives, enhancing team innovation and technical expertise.

2019-09 - 2020-09

Senior Technical Specialist

Thirdware Solutions Ltd, Chennai

Clients Handled: ZF-TRW (APAC, NA, SA, EU), AsteelFlash, Lear, Watts, AAM, Crane, Linxens, Superior (2019–2020)

- **Project & Client Management:** Successfully managed multiple client projects, ensuring timely completion and operational efficiency.
- **Troubleshooting & Technical Support:** Provided 2nd and 3rd level technical support, diagnosing and resolving database and QAD application issues via ticketing tools.
- **Monitoring & High Availability:** Monitored and resolved issues with Replication Servers, ensuring seamless data synchronization and system reliability.
- **Business Solutions & Customization:** Assessed client business requirements and delivered customized database solutions aligned with operational needs.

- **Training and Documentation:** Supported **self-service BI adoption** by training end-users and creating documentation for dashboards and data models.

2012-12 - 2019-09

Senior Associate

eNoah I Solutions Ltd, Chennai

Clients Handled: Protective, Cinta- Sayang, Comstar Automotive, CIRCOR Flow Technologies, GKN Drive Line, Cooper Standard, Albea, Yazaki (2013–2019)

- **Database Backup & Recovery:** Managed online, offline, and incremental backups, ensuring seamless restoration and disaster recovery readiness. Designed and implemented SQL backup strategies to prevent data loss.
- **Performance Optimization:** Conducted DB performance tuning, improving database efficiency and system responsiveness. Conducted indexing, partitioning, and query tuning to enhance efficiency.
- **Disaster Recovery & High Availability:** Monitored Disaster Recovery (DR) databases, ensuring robust backup and restoration strategies.
- **Business Analysis & Process Improvement:** Provided Business Analyst (BA) expertise for projects, aligning database solutions with business needs.
- **Training & Team Development:** Mentored and trained new team members, fostering a collaborative and high-performance culture.

2008-09 - 2012-07
